- **Closing date for Reception applications is 15th January 2019.**

STARS OF THE WEEK :

AM: Diana, for ALWAYS helping to tidy and following the nursery rules and routines.

PM: Tairell, for making special friendships and always remembering his manners.

This week's topic: Opposites

We have been talking about opposites, and night and day. We have looked at the changes we observe as day changes to night and we have discovered that some animals only come out at night. 'Opposites' is a difficult concept for the children to understand, but we have had fun finding objects that are opposites, (big/small, rough/smooth, hard/soft etc.)

Next week's topic: Vehicles

We will learn about vehicles. We will decide if a vehicle travels on roads, rails, water or in the air. We will find out if they relied on wheels, rota blades, wings, propellers, air, etc. We will study maps and look at how roads, railways and the sea are represented and decided which vehicles would use them.

Key sound/letter: 'O' "all around the octopus"

Opposite, octopus, oval, orange, oven etc…

Key words:- Car, van, bus, lorry, milk float, hot air balloon, air ship, ship, boat, glider, helicopter, aeroplane etc….

Home Activities:

- At bath time put a selection of objects into the water to see if they float or sink, ask your child why they float or sink.
- Talk about what different modes of transport you have travelled on i.e. bus, car, plane etc…
