Notices

- If you choose to give your children gloves rather than mittens then please teach them how to put them on by themselves. It is very time consuming for staff to put gloves on every child in nursery every time we go outside. If the children have mittens they are able to put them on independently, Thank you very much to the parents who have already thought of this. ☺

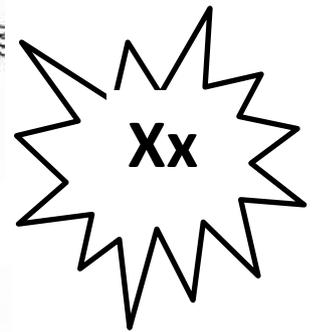

This week as its coming up to Valentine's Day the children learnt all about love. We learnt that the sign for love is a heart shape. We talked about the family and friends that we love and how loving them, and feeling that we are loved in return, makes us feel happy and secure. We learnt how important it is to show respect for each other too. We have been enjoying the 'Guess How Much I Love You' stories and many other children's stories about love. We also learnt rhymes with actions with the same theme. We tried to draw hearts and make heart shapes with our hands. We decorated beautiful collaged hearts and practiced mending broken hearts by matching one side of dots with the corresponding numeral on the other side.

First week's topic after
half term is...

Our body. We will learn to name the main parts of our body and what we use them for. We will also take a look inside our body at our major organs. We will learn why we have skin, a brain, bones, a heart, lungs etc

Next week's
letter/sound is...

Things to do at half term....

Please continue to practice name writing, or sounding out and writing CVC words if your child is at that level. When you share stories with your child, discuss the pictures and each part of the story as you read, talking about how the characters feel, what might happen next or how you could change the story ending. WE HOPE YOU HAVE A LOVELY HALF TERM! ☺
